**ERRATUM TO “MULTIPLICATION MODULES WHOSE
 ENDOMORPHISM RINGS ARE INTEGRAL DOMAINS,
 BULL. KOREAN MATH. SOC. 47 (2010), NO. 5, 1053–1066”**

SANG CHEOL LEE

Improper control words were used to produce the two wrong diagrams on p.1064 in the process of changing from the original AMS- $\text{\TeX}$ file to $\text{\LaTeX}$ file.

The two diagrams in Lemma 3.8, which were appeared on p.1064, should read as follows: one is

$$\begin{array}{ccccc} 0 & \longrightarrow & f(M) & \xrightarrow{\text{inc}} & M \\ & & \varphi \downarrow & & \\ & & M & & \end{array}$$

and the other one is

$$\begin{array}{ccccc} 0 & \longrightarrow & L & \xrightarrow{\text{inc}} & M \\ & & \varphi \downarrow & & \\ & & M & & \end{array}$$
